Objective:

➢ Seeking a Web Developer position to leverage my skills in crafting dynamic and efficient web applications, while concurrently acquiring valuable experience and driving the company's progress.

Skills:

- Programming Languages: JavaScript, Python, HTML5, CSS3.
- .Frameworks and Libraries: ReactJs, Django,GraphQL,Prisma, Tailwind CSS, MaterialUI, Bootstrap
- Databases: MySQL, PostgreSQL, SqliteDB
- Version Control: Git

Projects:

Ticket Booking:

- Designed and implemented a responsive movie ticket booking website using ReactJs, Django and Bootstrap.
- Created a robust and efficient backend using Django to handle user requests
- Implemented user authentication using Rest-Auth.
- Designed and implemented a state management system using Redux to track seat availability, seat selections, and booking progress.

Injury Tracking:

- Designed and Implemented Injury Tracking website using ReactJs, GraphQL, Prisma and ElephantSQL
- Implemented Google Authentication Using Auth0.
- Users can click on the body part on a human body simulation to report the injuries.

Dashboard:

- Developed an interactive data visualization dashboard using cutting-edge technologies including ReactJS, Chart.js, and Tailwind CSS.
- Implemented Pie Charts and Line Graphs for intuitive data representation, enhancing user comprehension.
- Designed features allowing users to access and analyze individual transaction details with ease.
- Integrated a user-friendly meeting schedule viewer to streamline workflow and improve productivity.

Rental Listing Website:

- Designed and developed a web application using ReactJS for the frontend and Django for the RESTful API backend.
- Implemented a role-based login system for both tenants and landlords.
- Tenants can search for available rental properties, and landlords can upload their properties for rent.
- Employed Django to handle data and API requests,and implemented data validation and authentication.
